Kepler: 2022-033

+ On April Fools Day, SpaceX launched their fourth dedicated SSO rideshare mission with 40 spacecraft onboard. The largest payload was the German hyperspectral Environmental Mapping and Analysis Program satellite at 980 kg. Other payloads included 5 ÑuSat visible + IR Earth observation sats, 12 Swarm 1/4U (400g) Spacebees, GNOMES-3 (radio occultation weather forecasting), Albania's first satellite (Albania-1), amateur radio BDSat, and D-Orbit's ION SCV orbital transfer vehicle that will host or later release "four Kleos Space CubeSats, three CubeSats from the University of Chile, and a passive payload for Spacelust called Upmosphere." SpaceX's Transporter-5 is scheduled for June. (ANS thanks The Orbital Index for the above information)
