Start: 29.12.2022 von ISS ausgesetzt

+ The TJREVERB are seeking a couple of stations skilled in communicating with satellites using APRS. The Thomas Jefferson High School for Science and Technology's TJREVERB satellite was deployed from the ISS on Dec 29th, and the team is still trying to successfully make contact with it. Please contact Curt Laumann, K7ZOO, if you're interested in assisting. His email address can be found on QRZ.com

+ A new Indian rocket successfully delivered three satellites to orbit on Thursday, Feb. 9[10], including Janus-1, which was built by the Indian-American company Antaris, is a technology-demonstrating "smart satellite," according to the ISRO mission description. Like its predecessor, AzaadiSAT-2 was built by hundreds of female students from across India. AzaadiSAT-2 "aims to demonstrate

LoRa and amateur radio communication capabilities, measure radiation levels in space and demonstrate expandable satellite structure, etc," ISRO officials wrote. (ANS thanks Space.com for the above information)
