TRANSPORTER-9 MISSION

=====

On Saturday, November 11 at 10:49 a.m. PT [18:49 UTC], Falcon 9 launched Transporter-9, SpaceX's ninth dedicated smallsat rideshare program mission, from Space Launch Complex 4E at Vandenberg Space Force Base in California. This was the 12th launch and landing of this Falcon 9 stage booster, which previously supported the launch of NROL-87, NROL-85, SARah-1, SWOT, Transporter-8, and six Starlink missions

During this mission, 90 payloads were expected to deploy from Falcon 9 across 89 deployments, and 86 deployments have been confirmed. Teams are continuing to review data for the remaining payloads, though it may take customers some time to provide additional information on the status of their payloads. (SpaceX)
